GREATER REWARDS.

NEW CAREER OPPORTUNITY

- If you are in the final year of undergraduate or master's studies at the Faculty of Technical Sciences and you want to apply your practical knowledge in a dynamic and challenging environment of the automotive industry, then Lear internship is the right choice for you. With mentors, experts in the field of Engineering, Quality and EHS, you will gain practical experience, and you will be able to work on personal development and start your first professional journey.
- Students of the following educational profiles can apply for a one-month internship for the following departments:
 - ✓ **Engineering - mechanical engineering, electrical engineering, mechatronics, industrial engineering**
 - ✓ **Quality - mechanical engineering and / or electrical engineering**
 - ✓ **Department of Safety, Health at Work and Environmental Protection - Occupational Safety Engineering, Environmental Protection.**

All you need to do is send your CV to the e-mail bdjekic@lear.com, take over your Instructions for performing professional practice at the faculty and expect a call from the Lear Corporation.
